

# Gregory (Bear) Shuford

connect@bear.direct · bearshuford.com · /in/bearshuford

## Objective

Seeking a software development role where I can use my diverse technical skills to contribute to the success of challenging projects.

## Skills

**Languages** JavaScript · TypeScript · HTML · CSS · SASS · Python · C#

**Frameworks** Vue.js · React.js · Django · ASP.NET MVC · Node.js

**Tools** Git · Visual Studio Code · Figma

**Other Skills** REST API integration · End-to-End Testing

## Experience

**Frontend Engineer** · *Perch* · Boston, MA Sep 2020 to Feb 2023 · 2 years 6 months

- Developed UI for internal tools using TypeScript, Vue.js, and Vuetify— focusing on scalability and user efficiency.
- Spearheaded the integration of automated testing frameworks like Cypress with QA teams to enhance application reliability.
- Participated in code reviews and provided constructive feedback to peers, fostering a collaborative and high-performing development team.

**Frontend Engineer** · *TaxSlayer* · Augusta, GA May 2018 to Sep 2020 · 2 years 4 months

- Developed and maintained user interfaces using HTML, SCSS, Vue.js, and React— ensuring high responsiveness and accessibility standards.
- Collaborated closely with UX teams to refine application interfaces.
- Implemented redesign of internal support applications to improve user experience.

**Frontend Developer** · *Concora* · Atlanta, GA Jun 2017 to Dec 2017 · 6 months

- Implemented advanced React and Redux components for dynamic web applications, focusing on optimal user interaction and state management.
- Enhanced testing practices by increasing front-end test coverage with tools like Enzyme and Mocha, ensuring robustness and reliability.

## Education

**Frontend Engineering** · *The Iron Yard* Aug 2016 to Dec 2016

Coursework began with HTML/CSS and vanilla JavaScript, progressed to using Handlebars.js for templating, Backbone.js for MVC architectures, and culminated with a primary focus on React.js.
